Applications

Suitable for **table runners, placemats, and outdoor deck chairs (sun loungers)**.Not suitable for **weft-direction tension (warp-direction tension only)**. Therefore, **not recommended for use on director's chairs**.

Light Fastness:

It is very difficult to establish a precise correlation between the light fastness of printed fabrics and their durability.Various factors, in addition to light exposure, can affect the print over time (sunlight intensity, humidity, etc.).The following table provides an approximate guide to the relationship between the **light fastness rating on the Blue Wool Scale** and the **expected print durability**.

8 -	Exceptionnelle	2 ans
7 -	Excellente	7 à 12 mois
6 -	Très bonne	3 à 6 mois
5 -	Bonne	2 à 3 mois
4 -	Assez bonne	1 mois
3 -	Modérée	2 semaines
2 -	Faible	4 à 7 jours
1 -	Très faible	1 à 2 jours

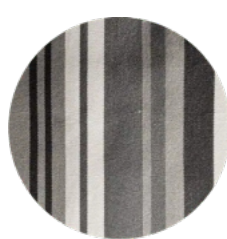

Note: For ratings above **Grade 5**, if the colour change falls between two grades on the Blue Wool Scale, the light fastness rating is indicated using both grades (e.g. **5-6**). If the colour darkens, the letter **N** is added to the rating.
