Applications

Suitable for **table runners, placemats, and outdoor deck chairs (sun loungers).Not suitable for weft-direction tension** *(warp-direction tension only)*. Therefore, **not recommended for use on director's chairs**.

Manufacturing Recommendations:

Hem each fabric panel and stitch the pieces together to ensure stronger, more durable seams.

Light Fastness:

It is very difficult to establish a precise correlation between the light fastness of printed fabrics and their durability.Various factors, in addition to light exposure, can affect the print over time (sunlight intensity, humidity, etc.).
The following table provides an approximate guide to the relationship between the **light fastness rating on the Blue Wool Scale** and the **expected print durability**.

8 -	Outstanding	2 years
7 -	Excellent	7 to 12 months
6 -	Very Good	3 to 6 months
5 -	Good	2 to 3 months
4 -	Fairly Good	1 month
3 -	Moderate	2 weeks
2 -	Poor	4 to 7 days
1 -	Very Poor	1 to 2 days

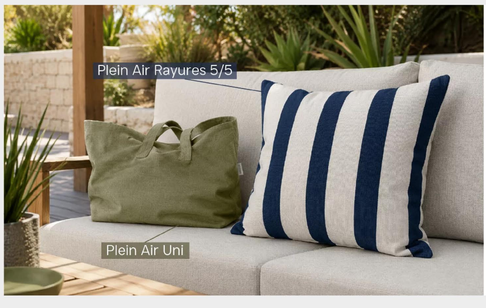

Note: For ratings above **Grade 5**, if the colour change falls between two grades on the Blue Wool Scale, the light fastness rating is indicated using both grades (e.g. **5–6**). If the colour darkens, the letter **N** is added to the rating.
